

# Global Engineering and Risk Mitigation

A History of Excellence. A Future of Innovation.

## Transforming the Fire, Life Safety & Security Industry

Telgian Engineering & Consulting, LLC (TEC) is a full-service global engineering and risk management consulting firm specializing in complex, multi-discipline public and private sector projects. We provide professional services related to the protection of people, property, information, and organizational mission against preventable losses.

TEC is a provider of strategic/enterprise risk management, fire protection engineering, industrial security, environmental health and safety, emergency management, operations continuity consulting, and construction administration services. Our professionals are dedicated to delivering value through effective protection solutions that meet today's risk challenges. In addition to a uniquely global perspective, we provide in-depth knowledge of local, state, and federal compliance matters.

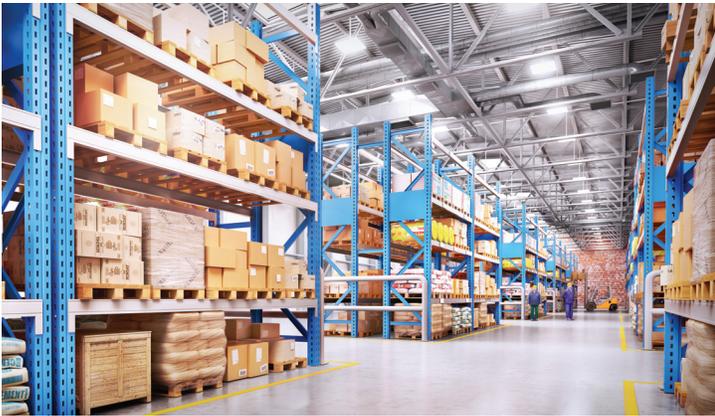

### Customer Advocacy. Innovative Solutions.

Customers know us by these defining characteristics; our team of experts understands the dynamic world of engineering and risk mitigation. The depth and diversity of our experience provides you with a clear understanding of your overall risk, empowering you to make informed, intelligent decisions. With TEC as your partner, you can focus on your business with comfort, knowing you are protected.

## Experienced. Skilled. Focused.

Given the high profile nature of our clients, and their obligation to provide safe environments, there is no room for error or inexperience in evaluating and mitigating risks. Planning and operational challenges are dramatically increasing due to complex threat/hazard vulnerabilities, financial limitations, liability concerns, and technological dynamics. Our principals and associates have been in responsible charge of a multitude of demanding, long-term, multi-discipline projects.

Working hand-in-hand with clients such as architects, engineers, owners, developers, risk and facility management firms, construction teams, and government agencies, we serve industry sectors that include commercial, education, energy, healthcare, hospitality, industrial, transportation, and more.

Our single point-of-contact, from project inception to completion, provides our clients with innovative, cost-effective risk mitigation solutions. TEC professionals operate under a strong Quality Assurance Program that is a direct result of proven performance on all of our engagements.

In addition to significant in-house capability, TEC maintains an unparalleled network of select subject matter experts. Licensed in all 50 U.S. states and Canada, TEC engineers offer industry expertise in fire and life safety codes, design, and construction management of vital systems. Our reliable solution delivery and execution process achieves consistency, accountability, and transparency.

## Strong Leadership. Exemplary Service.

To the direct benefit of our clients, our industry-leading professionals play an integral role in international codes and standards development. Our representation includes the American National Standards Institute (ANSI) and the International Organization for Standardization (ISO) code development committees, National Fire Protection Association (NFPA), American Society for Industrial Security (ASIS), and the U.S. Technical Advisory Group to the ISO Societal Security Standard (ISO/TC 223).

TEC engineers, designers, and former code officials provide real solutions to your most complex fire and life safety challenges. Our highly credentialed staff includes licensed Professional Engineers, Certified Protection Professionals, Certified Safety Professionals, and National Institute for Certification in Engineering Technology specialists.
