*Fire Safety*

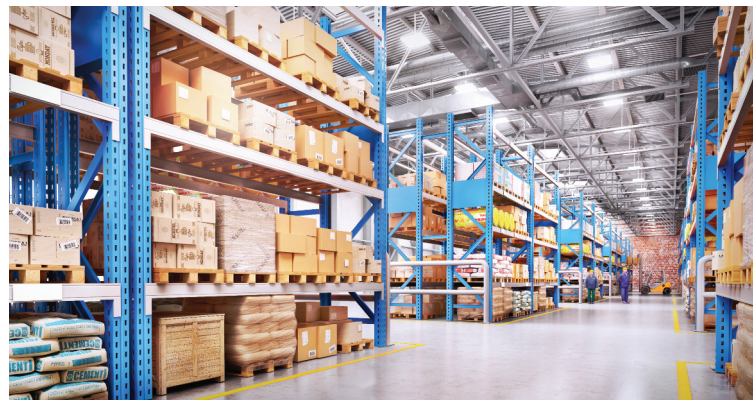

## The Most Comprehensive Fire Protection Services in the Industry

Since 1985, Telgian Fire Safety has served as a trusted partner to clients around the globe, providing innovative solutions and keeping facilities safe, compliant and on budget. Telgian's expertise includes testing, inspections and repair of Fire and Life Safety Systems, as well as inventory tracking, capital replacement programs and budgeting/forecasting.

We specialize in service to multi-location properties, as well as large single campus facilities. Telgian services approximately 50,000 locations annually throughout the US and abroad, providing a centralized approach and standardized way for clients to manage their FLS program including Inventory Tracking, Capital Replacement Programs, Budgeting and Forecasting, and a customer web portal.

Our customer-first mindset ensures that clients receive the best service for their unique needs, and our culture of customer advocacy guides how we operate. We are committed to protecting your interests, reducing your risks and providing you with peace of mind and reduced costs over time.

For first-class fire and life safety systems testing and inspection, *there is no substitute for Telgian.*

## Unbiased, Expert Inspections

Telgian is the only unbiased provider of fire and life safety systems testing and inspections. By separating the inspection and testing process from the repairs, we eliminate all conflicts of interest.

As a true international service provider, Telgian is committed to licensing compliance and holds the proper licenses in all parts of the country and abroad. Telgian experts are ready 24/7/365 to quickly and effectively handle your fire protection or life safety issue.

## Unparalleled Industry Experience

Telgian's leaders serve on National Fire Protection Association (NFPA) Committees, as well as on select International Code Council (ICC), American National Standards Institute (ANSI) and International Organization for Standardization (ISO) Section Committees. For decades, Telgian's experts have been actively involved in the NFPA code development process, working to literally transform the industry.

## Fire Protection Engineering and Design

Telgian experts understand the dynamic world of fire and life safety beyond testing and inspections. Our team offers comprehensive fire protection engineering, consulting and design through Telgian Engineering and Consulting, a full-service global engineering and risk mitigation consultancy specializing in complex, multi-discipline public and private sector projects. Our depth and diversity of experience in all facets of fire protection and life safety affords you a clear understanding of your overall risk, empowering you to make informed, intelligent decisions.

Telgian professionals are dedicated to delivering value through effective protection solutions that meet today's risk challenges. In addition to a uniquely global perspective, we also provide in-depth knowledge of local, state and federal compliance matters for architects, engineers, owners, developers, risk and facility management firms, construction teams and government agencies. We serve industry sectors that include government, commercial, education, healthcare, hospitality, industrial and transportation throughout the US and abroad.

- Fire Sprinkler and/or Alarm Engineering and Design
- Project Due Diligence
