- Fire Protection Engineering and Design

Maintaining a reliable fire life safety system in a retail environment is essential to ensure customer and employee safety, as well as to control unplanned expenses, which could affect your bottom line. Keeping fire protection systems properly tagged and certified keeps your business open and fully operational.

Since 1985, Telgian Fire Safety has served as a trusted partner to clients around the globe, keeping retail facilities safe, compliant and on budget. We specialize in multi-location properties, as well as large, single-campus facilities, and service approximately 50,000 locations annually throughout the US and abroad.

Streamlining FLS Testing and Inspections

As your advocate, we deliver simplified operations and reduction of compliance issues, while maintaining the highest level of safety at every location. Telgian provides a centralized approach and standardized way for clients to manage their FLS program, including inventory tracking, capital replacement programs, budgeting and forecasting.

Reducing Overall Life Cycle Costs

Telgian is the only unbiased provider of fire sprinkler, fire alarm and fire pump testing and inspection services. Unlike other service providers, Telgian completely separates the inspection and testing process from the repairs, eliminating all conflict of interest on behalf of the technicians performing the work. Our customers experience significant cost-savings because we are not tied to any product or supplier, resulting in unbiased, cutting-edge solutions to fit the fire protection and life safety needs of our customers. We also customize services to fit your operational and budgetary needs. Our competitive pricing is based on our nationwide coverage and logistics scheduling, which allows us to group new customer inspections into our existing schedule.

Leading the Fire and Life Safety Industry

Telgian is managed by industry leaders, engineers and fire protection experts who serve on more than 50 National Fire Protection Agency (NFPA) committees. Our highly-professional NICET Certified team of inspectors receive ongoing training to provide state-of-the-art knowledge to our customers. We ensure every location has the most cost-effective systems and are fully compliant with all jurisdictional requirements.

With over 350 industry experts and associates, we're here when you need us 24/7/365. We are ready to handle any issue, anywhere, at any time. For first-class fire and safety systems testing and inspection, there is no substitute for Telgian.
